

# PC\*MILER 37 Default Road Speeds

PC\*MILER's default road speeds are used to calculate a route's drive time unless traffic data is applied, custom speeds are specified or a governor maximum speed is enabled. *(An add-on license is necessary to take advantage of traffic data.)*

To find the default road speeds for a certain jurisdiction:

1. Locate a state or country in the **Road Speed Category by Jurisdiction** table below, and note its **Road Speed Category**.
2. Match the category to the following **Default Speeds by Road Class** table.

## Default Speeds by Road Class

Speeds are listed in mph.

| Road Speed Category | Vehicle Type | PC*MILER Road Class |       |                 |       |                 |       |                   |       |       |       |             |       |       |           |       |             |  |
|---------------------|--------------|---------------------|-------|-----------------|-------|-----------------|-------|-------------------|-------|-------|-------|-------------|-------|-------|-----------|-------|-------------|--|
